

Alex Steffen, Climate Writer - *The Snap Forward*

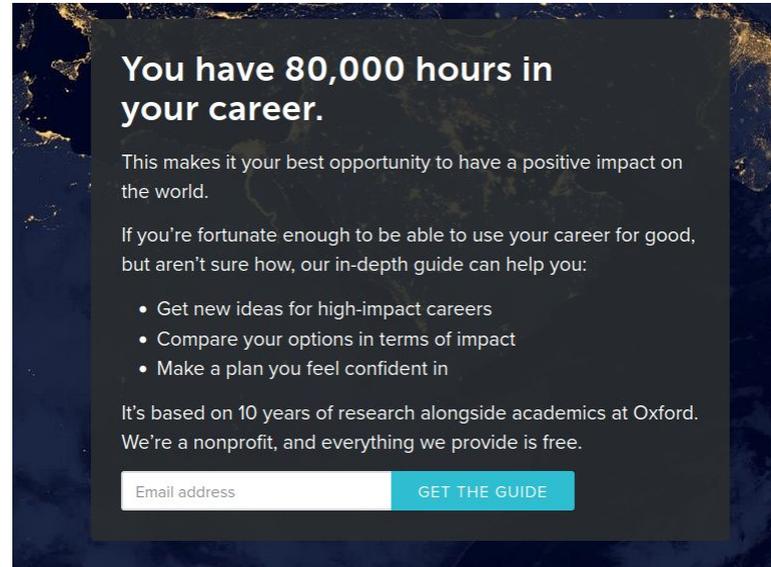

“We don’t get to choose whether the context of all our work is an unprecedented, all-encompassing planetary crisis. It simply is. There is nowhere to stand outside of it. We can pretend that’s not true — insist that our lives or work or special concerns will remain untouched by ecological catastrophe and societal upheaval — but in the long run, we’re just fooling ourselves.”

Climate career pathways

- Work directly on climate change
- Work directly on something else but bring awareness and action on climate to your job
- Regardless of your job, engage in climate action and activism

Your career is your biggest chance to make an impact

You have 80,000 hours in your career.

This makes it your best opportunity to have a positive impact on the world.

If you're fortunate enough to be able to use your career for good, but aren't sure how, our in-depth guide can help you:

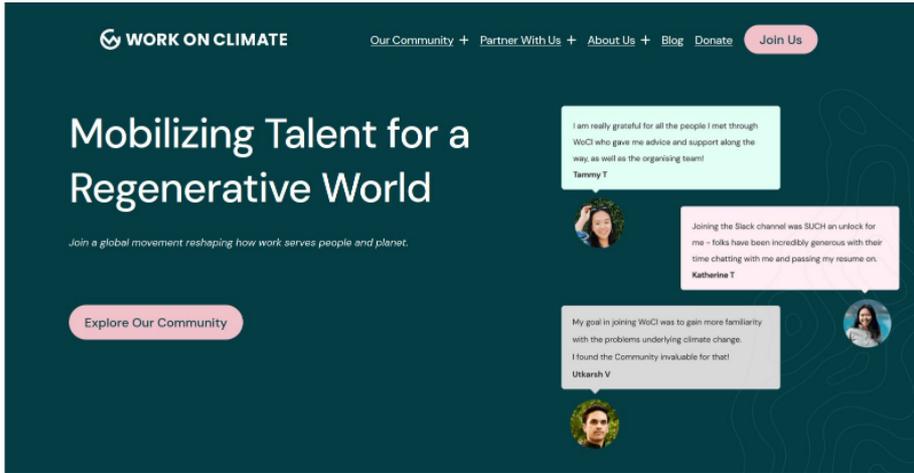

- Get new ideas for high-impact careers
- Compare your options in terms of impact
- Make a plan you feel confident in

It's based on 10 years of research alongside academics at Oxford. We're a nonprofit, and everything we provide is free.

Working on climate

Work On Climate is a global community of professionals seeking to use their talent to solve climate change and build a regenerative green economy, where all work strengthens natural and human systems.

We help you build relationships, find opportunities to use your strengths, and act together with others to create the regenerative transformation.

Our Programs

Expert Office Hours

Tap into the wisdom of those already driving change. Our experts help you navigate your path toward contributing to regeneration —

Events

We host gatherings that build the relationships and shared understanding needed to reimagine our economy. Come to

Volunteer

Our community is built by people who care. As a volunteer, you help create the conditions for others to find their place in the climate

On this week's episode of [Invested in Climate](#), we're joined by Robert Brown, Dire Yesterday ⌵ Research at Resolution Investors LLP and Chief Research Officer at Impact Evaluation Lab.

With decades of investment experience, Rob argues that it is time to step back from inauthentic impact goals and fuel this next chapter with analytical rigor. He brings a unique perspective on "mission authenticity"—the ability to truly deliver on the impact promises made to stakeholders.

Tune in for a look at how climate investing is maturing and the work that remains to be done.

Alex Roth 7:02 PM
I'm excited to share my recent conversation with Ellie Kinney, Senior Climate Advocacy Officer at the Conflict and Environment Observatory. We spoke on the latest episode of my podcast, [Financial Climate](http://financialclimate.fm) (<http://financialclimate.fm>).

Ellie and her colleagues advocate for the inclusion of military emissions in national accounting for greenhouse gas pollution. They estimate that the climate costs of military activities is above 5.5% of annual global emissions. That's nearly half the amount produced by all the world's cars, and more than all the emissions from aviation.

I sat down with Ellie to learn why military emissions data is so hard to come by, I wanted to know what can be done to improve transparency and how the climate impact of militaries

 **Volunteer opportunity – Senior Frontend / Platform Engineer (Remote)**

Bank.Green is looking for an experienced frontend / platform engineer to help steward our public website, used by **500k+** people to understand how their bank finances climate change. You'd be working **alongside another senior engineer**, with technical decisions made in a **collaborative, consensus-driven way**.

 **Stack:** Astro (in progress), React frontend, Cloudflare, Prismic CMS, GraphQL / REST APIs

 The site has ~5,000 pages, mostly **programmatically generated bank profile pages** (shared templates + structured data), so performance, caching, SEO, and build efficiency matter.

 **What you'd do:**

- Maintain and improve the Astro/React site
- Improve performance, caching, and build efficiency
- Review PRs and provide light mentorship
- Collaborate with another senior engineer on technical direction

 **Commitment:**

- Unpaid, volunteer role
- ~5-10 hrs/week, flexible
- Longer-term involvement (~6 months+)

 **Requirements:**

- Mid-to-senior frontend / full-stack experience
- Strong JS + React
- Portfolio or GitHub required
- Interest in climate accountability

 **Interested?**

Email zak@bank.green with a short intro and links to your GitHub / portfolio.

[Climate Strategist](#)
Who We Are

Gravity is powering the decarbonization of industry by helping businesses and their supply chain partners manage and reduce their carbon footprint. Our energy and carbon management platform makes it easy and cost-effective for companies to measure their emissions, implement tangible reduction projects with vetted vendors, and reduce both energy and emissions. We align the incentives and actors in a disconnected landscape to make real emissions reduction happen. Founded by leaders from generational startups, physical operators, and star academics, Gravity is backed by top VCs. On the strength of a differentiated product, we have quickly

“Every job is a climate job”

**CLIMATE SOLUTIONS
AT WORK**

Unleashing your employee power ▶

CLIMATE SOLUTIONS AT WORK

Introduction

- **Before you begin**
 - Getting to work
 - Moving beyond net zero
- Drawdown-aligned Framework
- Emissions Reductions
- Stakeholder Engagement and Collaboration

INTRODUCTION

Before you begin

Employees hold tremendous power—you and your colleagues are instrumental to how your company functions, innovates, and survives through uncertainty.

For many employees, the importance of climate action has taken center stage, but it can be hard to know where (and at which levels) to accelerate climate action in the workplace, and how to bring your own skills to the table. If your company leadership is serious about its climate ambition, then they will welcome employees to the work of helping them get there and holding them accountable. We see the

WHO THIS GUIDE IS FOR

Employees concerned about **climate change**, from those just starting their climate journeys to those ready to take concrete action in their workplace. This guide will help you understand whether your company is serious about addressing the climate crisis at scale—and how you can work with your colleagues to go further on climate.

WHAT THIS GUIDE IS

An illustrative suite of

<https://drawdown.org/publications/climate-solutions-at-work>

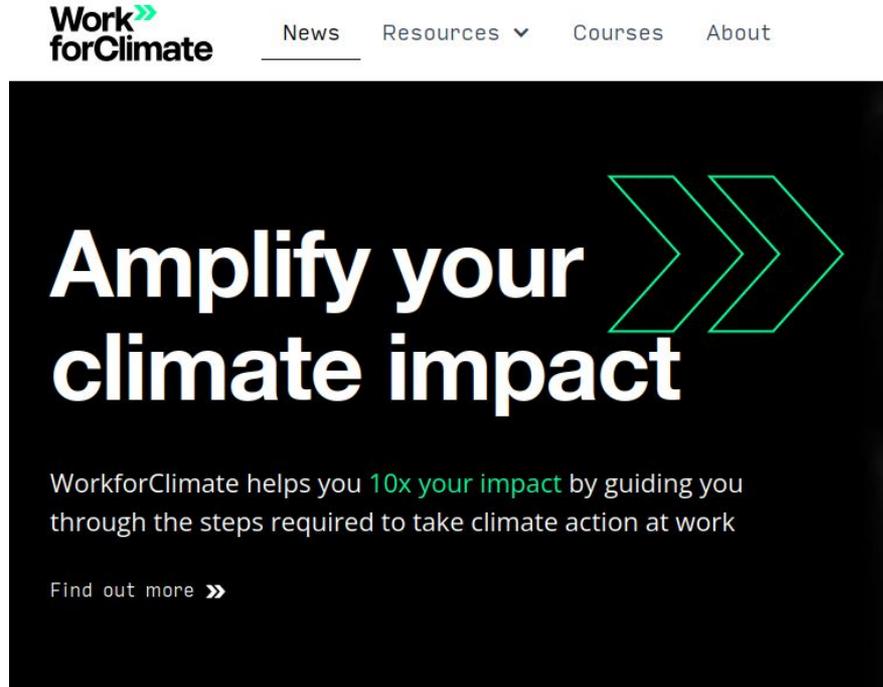

“Every job is a climate job”

	STATUS QUO		DRAWDOWN-ALIGNED
Emissions Reductions	Promises distant “net zero by 2050” commitment with reliance on offsets and no interim targets.	→	Moves on an accelerated timeline with interim targets and reduced reliance on offsets.
Stakeholder Engagement and Collaboration	Internal climate work is limited to sustainability teams and external engagement is primarily focused on investors.	→	Employees, communities, board members, and more are included.
Products, Partnerships, and Procurement	Products, partnerships, and procurement (the three Ps) are misaligned with climate commitments.	→	The three Ps are aligned with a company's sustainability strategy.
Investments and Financing	Corporate investments and employee retirement plans are misaligned with climate goals.	→	Business is fully divested from fossil fuels and invested in climate solutions.
Climate Disclosures	A lack of transparency on emissions and climate-related risks is the norm.	→	Public emissions and climate risk disclosures occur on a regular basis.
Climate Policy Advocacy	Corporate and trade associations are known to lobby against climate policy.	→	Lobbying and contributions support bold climate policy, including alignment from trade associations.
Business Model Transformation	Sustainability is an under-resourced add-on to the core business of the company.	→	Business models always shift center on scaling climate solutions.
Long-term Thinking	Business is focused on growth and quarterly returns.	→	Uses business influence to promote justice and shift economic paradigms to fit within planetary boundaries.

Where we are and where we need to go

Private-sector climate targets need to meet the global climate crisis at scale. Companies can become “drawdown-aligned” by meeting all of the requirements outlined in this guide.

“Every job is a climate job”

A dark-themed banner for WorkforClimate. At the top left is the logo 'WorkforClimate' with a green double arrow icon. To its right are navigation links: 'News' (underlined), 'Resources' (with a dropdown arrow), 'Courses', and 'About'. The main text reads 'Amplify your climate impact' in large white font, with a green double arrow icon to the right. Below this, it says 'WorkforClimate helps you 10x your impact by guiding you through the steps required to take climate action at work'. At the bottom left, it says 'Find out more' followed by a green double arrow icon.

• CLIMATE CHANGEMAKERS

Case study: How one employee got a climate-friendly option added to her company's 401(k)

When Camille Smith realised that her company's default 401(k) portfolio (essentially, the American version of a superannuation fund) was lacking in environmentally conscious fund options, she decided to do something about it. Here's how her persistence paid off in making climate-friendly investing available to everyone at her company.

• GETTING STARTED

4 pressing climate questions to ask your CEO right now

Ask questions. Get your boss to take climate action seriously. Simple.

Rapid, Far-reaching, Unprecedented Change.

The climate crisis is happening all around us. As tech workers, we can use our skills to take and accelerate climate action.

At ClimateAction.tech, we meet, discuss, learn and take climate action together.
We would love for you to join us on Slack.

[JOIN US ON SLACK](#)

Our Focus Areas

The internet is the world's largest machine. If we continue business-as-usual, the IT sector will be responsible for 14% of the world's carbon emissions by 2040 [HBR, 2020]. From our community conversations, these 4 subjects have emerged as levers for changing our industry:

 Business Culture & Behavior Change <p>We want businesses to prioritize climate issues and embed sustainability requirements into the day-to-day work of all employees.</p>	 Green Software Engineering <p>Software engineers can make decisions which reduce the carbon pollution of their applications.</p>	 Sustainable Product Design <p>We can change the product design process to reduce upstream and downstream emissions.</p>	 Low-Carbon Infrastructure <p>While we transition to renewable energy, we can align compute load with low-carbon energy.</p>

PEW RESEARCH CENTER

Climate action outside of work

WHAT WE DO:

#FridaysForFuture is a youth-led and -organised movement that began in August 2018, after 15-year-old Greta Thunberg and other young activists sat in front of the Swedish parliament every schoolday for three weeks, to protest against the lack of action on the climate crisis. She posted what she was doing on Instagram and Twitter and it soon went viral.
